POSITIVE THINKING

Accept ALL of YOU: Accept and embrace all of you. You will experience highs and lows as you go through life; you will become familiar with your strengths and weaknesses. If you only focus on what you think are your best moments or your most important contributions, you will miss out on the parts of you that keep going through the difficult times. On the other hand, if you only focus on your weaknesses or difficult moments and disappointment, you can lose the hope and confidence that keeps you going each day. Accept everything that makes you whole. Embrace the good and the bad, the highs and the lows. Celebrate ALL parts of YOU.
